DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Kevin McKinley on 25 October 2006.

The application has been amended as follows:

Lines 13-15 of claim 35 will be amended to recite: a controlling section configured to calculate a dew point in the reaction inhibiting section based on the indicated temperature and humidity, and controlling the temperature in the reaction inhibiting section so that the temperature is not less than the dew point.

Lines 21-25 of claim 36 will be amended to recite: wherein the apparatus has a temperature/humidity indicator detecting a temperature and a humidity in the interface station; and a controlling section configured to calculate a dew point in the interface section based on the indicated temperature and humidity, and controlling the temperature of the chill plate so that the temperature in the interface section is not lower than the dew point.

Claims 21-34, 43-52 and 62 are CANCELLED.

Allowable Subject Matter

2. Claims 35-36, 38-41 and 63-65 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or fairly suggest the claimed combination of elements. Specifically, the prior art of record fails to teach or suggest the combination including a reaction inhibiting section, wherein the reaction inhibiting section controls an extent that the progress of the resolution reaction of a resist is inhibited with regard to

the resist which is coated onto the substrate and exposed; a temperature/humidity indicator detecting a temperature and a humidity in the reaction inhibiting section; and a controlling section configured to calculate a dew point in the reaction inhibiting section based on the indicated temperature and humidity, and controlling the temperature in the reaction inhibiting section so that the temperature is not lower than the dew point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USP 5,167,714; USP 5,912,184; and USP 6,279,650 each disclose mechanisms for detecting temperature and humidity but they are not configured to control an apparatus as recited.
